## WORK EXPERIENCE

### FREELANCE

Freelance Full Stack Developer

May 2024 – Now

İstanbul, TR

- As a freelance developer, I have built and deployed multiple frontend applications using React and MobX, with some backend development experience in .NET. I have worked extensively with both SOAP and REST APIs, integrating web services into scalable and production-ready applications. My projects have successfully gone live and are actively being used. I enjoy tackling complex challenges and delivering high-quality, maintainable software solutions.

### i2i SYSTEMS

DevOps Engineer

September 2024 – Now

İstanbul, TR

- As a DevOps Engineer, I am responsible for release management, deployment processes, and CI/CD operations. I have expertise in tools and technologies such as Git, GitLab, GitLab Pipelines, Bash Scripting, Docker, which are integral to our workflows.
- My role involves managing branches in GitLab based on developer developments, building and encrypting artifacts (e.g., JAR files) using pipelines, and deploying these modules to environments. If any issues arise during deployment, I troubleshoot and resolve them with developers. I have also worked with AWS services, specifically EC2 and RDS, to set up and configure environments by launching instances and establishing the required infrastructure.
- Moreover, I contribute as a Full Stack Developer in an in-house project that is actively used within the organization. This project is built with Next.js, TypeScript, Zustand, and Prisma, showcasing my capabilities in modern web development.

### JOTFORM

Frontend Developer Intern

June 2024 – August 2024

İstanbul, TR

- As a member of the Jr. Growth Tools team, I developed an analytics dashboard application for social media posts with my colleagues using technologies such as React, Redux, and Redux-Saga. Additionally, I integrated an AI chat feature into the project to assist with analytics.

### ELMALI TECH

Frontend Developer

October 2023 – April 2024

İzmir, TR (Remote)

- I worked in a team that developed high user experience and responsive applications for various companies using technologies such as React, Next.js, and Tailwind. Additionally, I had the opportunity to learn and work with Docker containers.

### LOGO SOFTWARE

Software Developer Intern

July 2023 – September 2023

İstanbul, TR

- Developed an HR project using Java. Collaborated with developers to debug software and coordinated project tasks across departments. Supported development, QA, and UX teams in creating new products. Learned software engineering best practices and assisted with testing client-server network components.

## EDUCATION

---

**Karadeniz Technical University**  
**Computer Engineering**

**June,2024**

- **GPA:3.2/4.0**
- Here is the YouTube video link for my final project: [Mentorify Youtube Link](#)
- In my final project,Mentorify,I worked on the frontend using Next.js.This site facilitates easier communication between mentors and mentees and uses AI to recommend mentors based on the mentee's interests. Additionally, we use WebSocket for real-time chat functionality.
